00:00 Mazhar I.: Hello. Hello, can you hear me?

00:33 Mazhar I.: Hello. Um, nope, I can't hear you.

01:45 matteo d.a.: Hello? Ah, okay. My bad.

01:48 Mazhar I.: Yes. No worries. Uh, thanks so much for joining me. First of all, thanks so much for, like, scheduling a call and then joining me on time. Um, it's generally nice of you. Can I have a little bit introduction from your side, if you can give me a little bit of background about you? And even though if you can turn on your camera, that would be awesome.

02:08 matteo d.a.: Uh, yeah, but I'm on my desktop, and I don't have a webcam here, so... That will be difficult, my bad.

02:12 Mazhar I.: Alright, no worries. Alright, no worries. So, if you can share me a little bit background about yourself, then I can give you mine, and we can kind of discuss the project. Sounds good.

02:22 matteo d.a.: Uh, yeah, so, um, I'm just a student of criminology in Belgium.

02:25 Mazhar I.: Hi, I'm transcribing this call with my Tactiq AI Extension. <https://tactiq.io/r/transcribing>

02:29 matteo d.a.: And, uh, I'm trying to, uh, make a workflow for, like, a business plan that I want to start up.

02:37 Mazhar I.: Mm-hmm.

02:37 matteo d.a.: Uh, but I'm... I think I'm, like, pretty close, but uh... as I don't have a background in, like, coding and NA-10. I'm stuck in, like, small things that I, like, I have no clue what it's about, so... Maybe I can share my screen.

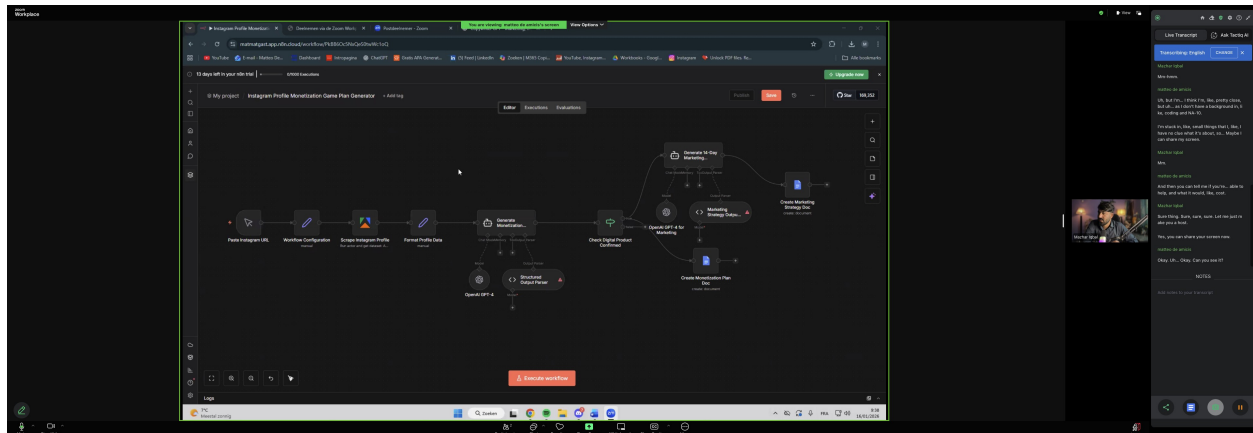

02:43 Mazhar I.: Mm.

02:51 matteo d.a.: And then you can tell me if you're... able to help, and what it would, like, cost.

02:51 Mazhar I.: Sure thing. Sure, sure, sure. Let me just make you a host. Yes, you can share your screen now.

03:00 matteo d.a.: Okay. Uh... Okay. Can you see it?

03:09 Mazhar I.: Um, yep, yeah, I can see now.

03:11 matteo d.a.: Okay, so this is, like, what I have. So basically, the thing is, I want to, like, um... take an Instagram account.

03:14 Mazhar I.: Mm-hmm. Mm-hmm. Mm-hmm.

03:21 matteo d.a.: From, like, sort of an influencer. I want to drop it in here, and make it, like, extract all, like, important information.

03:25 Mazhar I.: Mm-hmm. Mm-hmm. Mm-hmm.

03:32 matteo d.a.: of, like, likes and comments and interaction. Um, and then

based on all that information, I wanted to make, um... like a monetization plan. on what I can offer them for, like, a business plan.

03:40 Mazhar I.: Huh.

03:45 matteo d.a.: Um, and therefore, for that, I have, like, um, certain templates. Can you see it?

03:52 Mazhar I.: Um... nope. Yeah, I can see now.

03:54 matteo d.a.: Uh, this is like a template that I wanted to, like, make for me. based on all the information. And that I wanted to, like, put in a Google document.

03:58 Mazhar I.: Hmm.

04:03 matteo d.a.: Okay? But after that, when I have, like, an arrangement with the influencer.

04:03 Mazhar I.: Hmm. Uh-huh.

04:11 matteo d.a.: And we make an agreement on a digital product that we're going to sell for them.

04:15 Mazhar I.: Uh-huh. Mm-hmm.

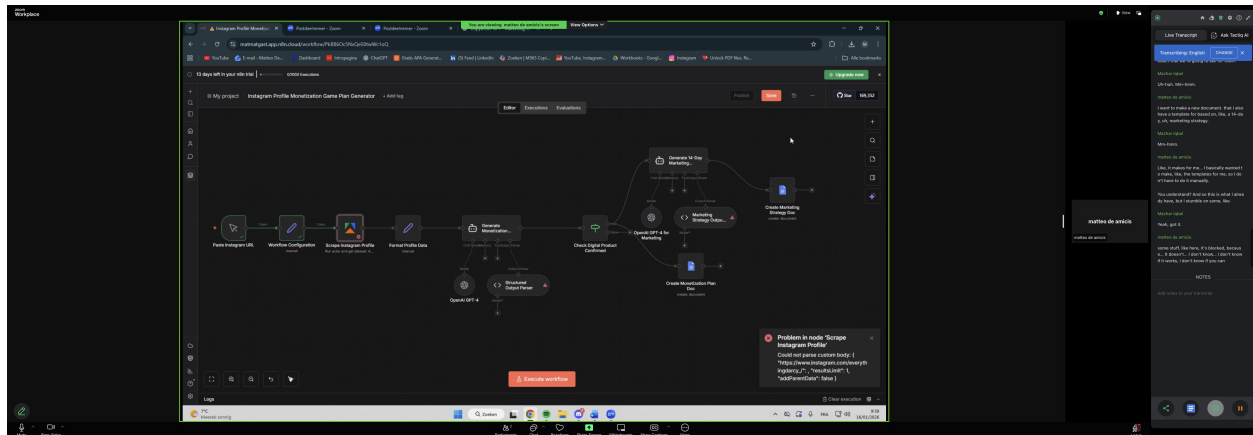

04:15 matteo d.a.: I want to make a new document. that I also have a template for based on, like, a 14-day, uh, marketing strategy.

04:26 Mazhar I.: Mm-hmm.

04:27 matteo d.a.: Like, it makes for me... I basically wanted to make, like, the templates for me, so I don't have to do it manually. You understand? And so this is what I already have, but I stumble on some, like.

04:35 Mazhar I.: Yeah, got it.

04:38 matteo d.a.: some stuff, like here, it's blocked, because... It doesn't... I don't know... I don't know if it works, I don't know if you can see, or, like, uh, what I mean, and... What do you think you have to do to fix it?

04:49 Mazhar I.: Mm-hmm. All right, so that's what you want at the moment, right?

05:03 matteo d.a.: Yes, and that's only for me, like, I don't want it, like, to publish it for a website, or... it's just for me. So, like, for my own business.

05:03 Mazhar I.: Alright, that's great. So yeah, let me give you my introduction, and then I can get back to you with this message. And, uh, let me give you my introduction. So, uh, it's been 6 years that I'm working as a freelancer.

05:12 matteo d.a.: Okay. Yes.

05:13 Mazhar I.: Um, can you hear me? Because the internet is lost. So, um, it's been 6 years that I'm working as a freelancer, and over the last 6 years, I built my own company, basically based over services, so we have been doing a lot of stuff in e-comm. Like, in e-commerce, right, where we have been managing Amazon brands and everything, but if we talk about specifically AI automation,

then over there, uh, it's been one and a half year now that we have been doing this kind of stuff. And at the moment, I'm backed by A developers. A developers are working within my team, and 3 and 4. Uh, of them got 4 to 5 years of experience with custom coding and AI automation kind of stuff, and.

05:49 Mazhar I.: Using Anitan, MakeTORCOM, Zapier, these are, like, automation... general automation platform that we have been doing. And along the way, if I talk about what we have been doing, they're like. Most into content creation system, chatbot, voice agent, and. I would say scrappers, this is kind of like scraper, like, uh, first of all, we are scrapping someone, uh, information, and based on that, we are kind of, like, crafting.

06:05 matteo d.a.: Yeah.

06:10 Mazhar I.: specific marketing plan and everything. So yeah, this is what we have done so far, even though this is what I have done for my own company, right? We are scrapping. We have been scrapping Amazon listings, and based on that, we have been, like. creating the content, and then. Uh, based on that, we have been creating Google Doc, and then from the available, like. reaching out to brands for. our services and everything. So this is, like, same kind of, like. thing that you are trying to build out. And... Whether we are offering something unique that's, like, once the system is done, we provide walkthrough videos, documentation file, and.

06:37 matteo d.a.: Yeah.

06:44 Mazhar I.: 70s free sports, so a client can ask any sort of question, because again, it's an AI system. error can happen over there, so that's why we provide support, to kind of, like, if there's an error coming in, we'll just go ahead and fix that issue right away, because we have seen a lot of clients coming to us.

06:59 Mazhar I.: like, hey, this is my broken workflow, I need, uh, if you can fix me, I can pay you, something like that, so... So that's why to product that, that way we provide kind of, like, uh...

07:06 matteo d.a.: Yeah.

07:11 Mazhar I.: additional support, right? So this is, like, kind of a little bit introduction from my side, and what I can do over here, I can go and create a group with you as my developer.

07:12 matteo d.a.: Okay.

07:20 Mazhar I.: and my developer can see and fix the issue, and based on the, like, information that you are trying to.

07:27 Mazhar I.: get and make the marketing plan. From there, we can, uh, go. Sounds good?

07:33 matteo d.a.: Okay, so what do you, what do you... what's... what is the plan, then?

07:35 Mazhar I.: Oh, alright, so what's... the plan is that, because obviously our Fiverr, I can't really create a group with GM and developers, so if you can share your WhatsApp number, because we are using WhatsApp for all server communication, but for the payments and everything, we use Fiverr.

07:48 matteo d.a.: Okay, so I'll just give you my number then?

07:52 Mazhar I.: Yeah, you can drop your number in the Zoom chat, I can just message you right away.

07:55 matteo d.a.: Okay, wait... Mateo.

07:58 Mazhar I.: How do you pronounce your name? material. Alright, that's great. I got the screenshot of, uh, the workflow. And then I'm gonna share the whole meeting transcription in the group once I create that, and then... Um, yep, that's...

and we would be responsible for. Delivering the whole system without errors and everything with the documentation file and walkthrough videos. And if you say that, hey, guys, just bill. just fix the errors, then we'll just go and fix the errors, and... Whatever the time we are spending, we'll just, uh... charge you based on the time that we spend. And there is, like, \$35 per hour. That's how we charge to kind of, like, uh, fix the errors.

09:37 matteo d.a.: Okay, but honestly, um, I'm just saying... just to be fucking clear, um... I'm not gonna pay, like, more than fucking 100 bucks, because I think I'm, like, pretty close. Um, but I'm just breaking my head. Uh, because I don't have a clue how it works.

09:50 Mazhar I.: Hmm.

09:56 matteo d.a.: So, I think it's like, it shouldn't take more than 2 hours, you feel me? So...

10:03 Mazhar I.: Hmm. All right. Alright, so, um, Fisher...

10:06 matteo d.a.: If it's gonna be more than that, I'm gonna be honest, I'm just gonna leave it there.

10:11 Mazhar I.: Mm-hmm. Alright, so, um, the problem that you just mentioned, we can fix that in 100 bucks. And we can go from there. Because, again... Yeah, you have already built out the problem that you mentioned, the first of all, uh, the scrap is not working.

10:20 matteo d.a.: Yeah, so that's, like, my maximum.

10:28 Mazhar I.: And we have to create two plans first, uh... for the India's marketing plan, and then the first one was, like, generating, uh, the kind of, like, audit plan based on their information that they have. These are, like, three things that we need to fix in 100 bucks.

10:46 matteo d.a.: Yeah, so that's... that's basically... that's basically it, yeah. So, first thing it does, it scrapes the Instagram.

10:49 Mazhar I.: Yeah. Hmm...

10:52 matteo d.a.: It makes a fuck... it makes, uh, like, uh... a monetization audit. And then I... I talk with the influencer. We discuss, um... a digital product, and then, based on the product, I wanted to make a new.

10:57 Mazhar I.: Mm-hmm. Hmm.

11:10 matteo d.a.: marketing strategy to market the. uh, the product. And... These two documents, I have the templates, so it should just make the

templates based on the information.

11:15 Mazhar I.: Ah, all right. Mm-hmm. Mm-hmm. Alright, so you... Yeah, yeah, you can send me the template. And the second thing, why are you so frustrated, by the way?

11:23 matteo d.a.: And I sent you the... I sent you the templates. Uh, I've been... I've been, uh, I've been breaking my head on this for, like, hours and hours and hours since the last, uh, week, and.

11:31 Mazhar I.: Just out of court.

11:38 matteo d.a.: I don't have any background in coding or. NA-10 or whatsoever, so... I'm just breaking my head on it.
